

Specifications

Residential specification

Whether it's a leisure lodge or a contemporary park home you're looking for, the Willerby lodge collection can cater to your needs.

'Next Generation' Lodges From Willerby

Every year thousands of discerning people buy a new Willerby Holiday Home or Leisure Lodge and successfully escape the hectic pace of modern life to maximise their leisure time in a 'Next Generation' Willerby lifestyle environment.

As standard all Willerby Lodges are built to Holiday Home specification EN 1647, however Residential Park Home and Residential Park Lodge buyers can now also enjoy all the same Willerby 'lifestyle environment' benefits by selecting the optional Willerby 'Residential Specification'.**

Residential Specification - Option

Available on New England, Ridgewood*, Oyster Bay, Boston, New Jersey, New Hampshire and Key West lodges. Built to satisfy the demanding standards of BS 3632, Willerby's 'Residential Specification' features all the 'lifestyle' luxuries of the EN 1647 models with the following additions:

- **Low-E High Performance Glass throughout to all external doors and windows**
- **125mm superior Rockwool™ insulation within roof void**
- **125mm external walls with 75mm superior Rockwool™ insulation to satisfy BS 3632 thermal and acoustic standards**
- **Condensing boiler**
- **Internal water shut off valve**
- **Insulated composite sandwich floor construction (refer to Willerby for more information)**
- **10 year warranty scheme (available on selected parks only. Terms and conditions apply - Further details available on request)**

*Due to the high specification construction of the Ridgewood, the standard roof, wall and floor structures exceed the requirements of BS 3632, and therefore remain unchanged when specifying a residential version. (More details are available on request)

**Refer to Park Licence and associated planning conditions when selecting Holiday Homes EN 1647 or Residential BS 3632 specification versions of this product.

Environmental considerations

Willerby is leading the industry in the pursuit of environmental excellence with the aim of developing products you can enjoy with total peace of mind.

We have a strong 'green conscience' and were devising ways of reducing our environmental impact long before it became a hot topic.

All of the products we design and manufacture pay careful consideration to the environment, starting with the sensible selection and consumption of raw materials, right through to energy efficiency and waste management during manufacture.

Willerby pioneered the use of energy efficient lighting in the industry and our range of lodges are designed to provide optimal thermal and energy efficient properties throughout their lifetime. We strive to use 'A rated' appliances wherever possible, further helping you to reduce your own carbon footprint.

We are committed to producing the highest quality products whilst running our business in a responsible, environmentally sound and sustainable manner.
